

# VERTICAL RETRACTABLE LIFELINE

## HE-6

### 6m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >1250kg wire breaking point
- Maximum stop distance 1.5m
- Weight 4.8kg

## HE-10

### 10m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >1250kg wire breaking point
- Maximum stop distance 1.5m
- Weight 5.3kg

## HE-15

### 15m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >1250kg wire breaking point
- Maximum stop distance 1.5m
- Weight 7.2kg

# VERTICAL RETRACTABLE LIFELINE

## HE-20

### 20m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >2000kg wire breaking point
- Maximum stop distance 1.5m
- Weight 9.2kg

## HE-25

### 25m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >2000kg wire breaking point
- Maximum stop distance 1.5m
- Weight 11.6kg

## HE-30

### 30m length

- 4mm diameter galvanised steel lifeline
- Self retracting cable on drum with centrifugal brake
- EN360 Certified
- K300 Karabiner CE EN362
- S-2146 CE EN362
- Fall indicator
- Working load of 20 to 140kg
- >2000kg wire breaking point
- Maximum stop distance 1.5m
- Weight 12kg
