ONGARD™

Face Protection

Reduce Costs By Changing Out Only The Window
In Your Faceshield Versus Replacing The Entire Unit.

ONGARD™ Head Gear

The Ongard Headgear is designed for full-shift comfort, performance and versatility. The easy snap-on attachment system allows for quick replacement of the window without having to replace the whole unit, saving precious dollars. Snug fitting comfort is obtained with Twizloc™ adjustment, and correct nape placement with the Swivel™ cam.

The regular design ALUTATCH accessory accommodates most manufacturers cap-style hard-hats. It utilizes the full range of BULLET™ windows, allowing for easy replacement in seconds.

ALUTATCH™

- Mounts Quickly and Firmly
- Dual Pivot Friction Design For Custom Tilt Adjustment
- Exceptional Performance In High Heat Areas

Get With Looking After Your Good Looks... Wear Face Protection.

ONGARD™ **BULLET™** Windows

The CanaSafe ONGARD™ faceshield system provides that much sought after "wrap-around" design that offers form fitting security, robust construction and flexible adjustment. The ongard crown protector has full tilt function, Twizloc™ sizing and Swivel™ comfort zone whilst the molded BULLET™ windows offer low profile fit with uncrompromising coverage.

For proper eye protection, always wear safety goggles or safety glasses under visors and faceshields.

Improve your workplace safety by using the correct window. BULLET™ High Impact windows are manufactured from optical grade polycarbonate and are designed for task-specific applications. Clear polycarbonate offers excellent visibility for general purpose use, gray tint reduces glare in outdoor environments, IR shade 5 windows are used in furnace and metal working applications (NOT FOR ELECTRIC ARC WELDING) whilst gold coated versions excel in reflecting radiant heat and absorbing harmful Infrared radiation.

- Molded "Bullet" design
- Absorbs 99.9% of UV
- Task Specific interchangeable windows
- Headgear and windows sold separately for complete versatility
- Manufactured in an ISO9001 facility
- Meets and exceeds ANSI Z87.1-2003 and EN166:2001
