Has obtained **EC TYPE EXAMINATION INSPECTION CERTIFICATION**, in compliance with what is stated in Directive 89/686/EEC and in agreement with the applicable test procedures according to standards *EN ISO 13688:2013* General requirements and *UNE-EN 469:2006/1M:2007* against risks in the operation of firefighting and related activities (Xf2, Xr2, Y2, Z2), having attained the levels of provision specified in **TEST TECHNICAL REPORT N°2015CO2094CE** and in **PPE'S TECHNICAL DOCUMENTATION**.

Said certification is valid for the following articles:

PPE TYPE “SUIT 832800300 (JACKET 841800300 + TROUSERS 842800300)” destined to the protection of the entire body of the user with exception of head, hands and feet, against risks in the operation of firefighting and related activities.

Manufactured by: KIVANC KIMYA SANAYYI VE TICARET A-S

PPE DESCRIPTION:

A jacket and trouser set in navy blue woven fabric, waterproof membrane of yellow non-woven with white coating, yellow non-woven insulating layer and grey woven lining: the two inner layers are quilted. The collar is formed from the main assembly and has a further layer of navy blue fabric on the inner face. Both garments have 5 cm-wide bands of reflective tape, fluorescent yellow in the centre and grey on the edges arranged horizontally thus: two around the upper body, two around each sleeve and one around each leg and then vertically on the back joining the top and bottom bands and over the outside-leg seam from the leg around the band to the trouser hem. **JACKET:** Garment comprising front and rear pieces, sleeves, collar and cuffs. Each front piece is straight and made from a single piece of fabric, and close down the centre with a plastic zip with metal pull which runs from the bottom of the collar to 10 cm from the hem, covered by a 10cm wide exterior flap sewn to the left-hand front and fastening over the right with self-fastening tape and an interior flap formed by an extension of the right-hand front measuring 3 cm in width. The left-hand breast has a pocket with a horizontal opening, closed with a flap fastened with self-fastening tape. Each side has a waist pocket with a horizontal opening, closed with a flap fastened with self-fastening tape. The left-hand pocket has a strip of fabric which closes over itself with a metal snap button and the right-hand front has an interior pocket with a

horizontal opening, closed with a flap fastened with self-fastening tape. The back is made from a single straight piece of fabric and a garment identification label and hanging loop are attached at the collar seam. The sleeves are made from 3 pieces of fabric sewn together: two vertically along the length of the sleeve and one oval-shaped underarm piece. The sleeves end in an interior backstitched hem and adjust with self-fastening tape. A storm cuff is inserted in navy blue knitted fabric. On the outer cuff and the inside underarm is a loop of fabric. The collar is straight with rounded edges and closes at the throat with a strip of self-fastening tape attached to the left-hand wing. Garment end in an interior backstitched hem. TROUSERS: Comprising front and rear pieces, waistband and braces: The two fronts are made from a single piece each and joined to each other at the inside and outside leg seams and the crotch. The fly fastens with self-fastening tape and a metal snap button. The two rear pieces are made from a single piece each and joined to each other at the inside and outside leg seams and the crotch. A garment size label is attached inside at the waist seam. The waistband is made from a single, 4 cm-wide piece of fabric and is elasticated at the sides. There is a belt loop either side at the front, holding black plastic quick-release buckles and the braces are sewn to the back of the waistband. The braces are made in black elasticated tape and have a plastic adjuster and quick-release buckles in black plastic, male. The braces cross over at the back, and are fixed with stitching. The trousers end in an interior backstitched hem.

The materials that form the PPE, are described in the test technical report n° 2015CO2094.

It shall be the manufacturer's sole responsibility to furnish specific information pertaining to this certificate and the tested levels of protection.

PPE's CAT. III shall be submitted to control tests according to the Art. 11 of the Directive 89/686/EEC.
